COMFORT

INTELLIGENT AUTOMATION AND SECURITY

AN INTRUDER ALARM FOR THE 21ST CENTURY

COMFORT integrates intruder alarm and intelligent automation into an easy-to-use, practical, convenient and affordable system.

With COMFORT technology, a smart home or office is more accessible than ever.

SECURITY

COMFORT

CONVENIENCE

ENERGY SAVING

USE COMFORT TO EFFORTLESSLY CONTROL:

- ✓ Alarm
- ✓ Lights
- ✓ Blinds
- ✓ Automatic Gates
- ✓ Electric Locks
- ✓ Heating & Air Conditioning
- ✓ Entertainment Systems
- ✓ Pools & Watering Systems
- ✓ Pumps and valves
- and more...

AUTOMATE

INTELLIGENCE BUILT IN

True Automation is a lot more than the simple remote control of your home.

With a security system that can naturally mimic lighting/ appliance habits when you're away; an alarm that can track and broadcast the location of an intruder; and sensor-controlled lighting, blinds and temperature control; COMFORT is always intelligently looking after your home.

COMFORT has a powerful programming 'language' which can be used to suit almost any requirement.

CASE 1

When you're away and intruders are detected; COMFORT can randomly or strategically turn on lighting & appliances. Motion sensors in the garden can turn on outside lights and play a warning message, or turn on a sequence of interior lights to give the appearance that someone is in the house.

CASE 2

Control your house when you're away. For example, turn on the hot tub or air conditioning when you're just paying your restaurant bill.

CASE 3

Use sensors to turn on lights as you move through the home at night or when natural lighting is low.

CASE 4

Conveniently group lights and appliances into Scenes so that one tap on your phone can effortlessly close the blinds, unfurl a projection screen, turn on a projector and other home cinema equipment, and start playing a movie.

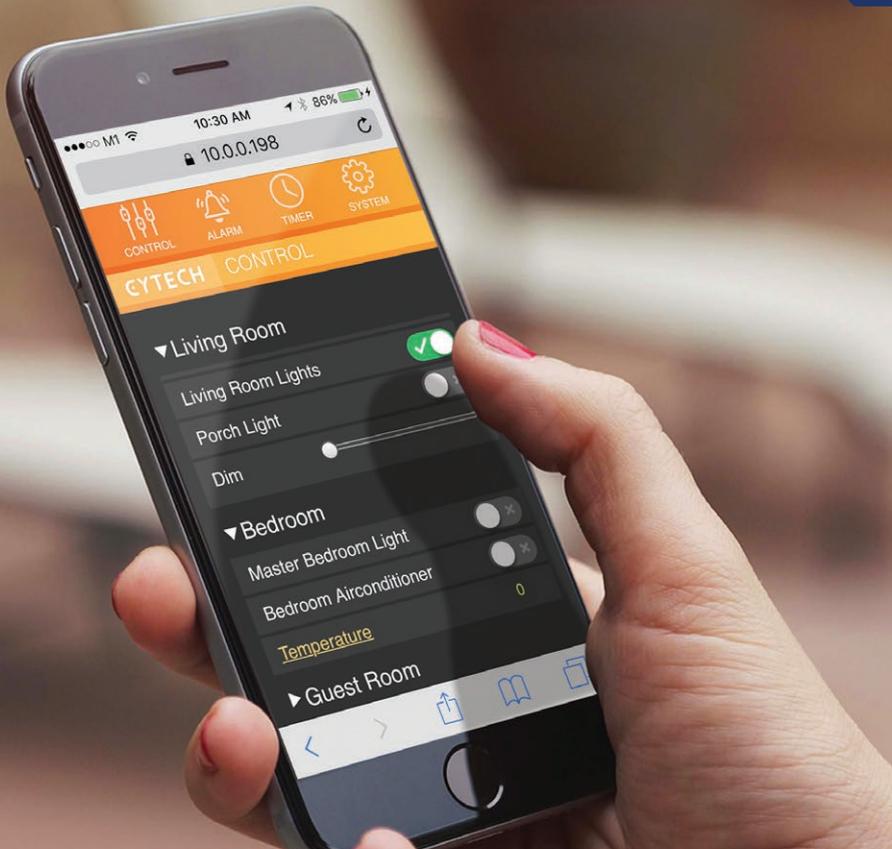

CASE 5

Automatically contact security, emergency or utility services. For example, it can send you a text and phone the security company if an intruder is detected.

CASE 6

Program Schedules to automatically switch off all lights, air-conditioning and photocopying machines and arm the security system in the office at 11 PM, and turn on the coffee machine and lights in the morning on weekdays.

TAKE CONTROL

FREE IOS & ANDROID APPS

The COMFORT app gives you full control and monitoring of alarm, lighting and appliances via your phone from anywhere in the world!

INTEGRATE

EFFORTLESS SYSTEM INTEGRATION

COMFORT is a powerful hub for a whole host of 3rd party lighting and electrical systems (e.g. C-Bus, KNX, Dynalite, Velbus, Lutron, Rako, Modbus etc) to deliver advanced Home Automation.

Control COMFORT via **Apple Siri** or **Google Home/Alexa** over the internet with the optional UCM/Pi (embedded Industrial Raspberry Pi)

COMFORT ties all external subsystems and sensors together by logic, and has a powerful programming 'language' that can be tailored to suit almost any requirement.

COMFORT makes life easy for your installer!

PRODUCTS

- COMFORT CM9001 Controller, with Alarm Zones/Inputs, 8 Outputs expandable to 96 Inputs/Outputs, with Telephone interface, Voice announcements, Dialer to 8 phones triggered by any Alarm, Time Programs, Logic Programming Engine, 4 Alarm Partitions, Charging for Standby Battery
- Keypads: Up to 15 keypads in a system
- ETH03 Ethernet Interface: Access: allows access by Cytech Mobile apps
- UCM/GSM Module: Sends SMS and dials to mobile phones during alarms
- UCM Interfaces for C-Bus, KNX, Modbus, Velbus and other 3rd party systems
- UCM/Pi with Industrial-grade Raspberry Pi interface supporting MQTT, Node-Red, OpenHab and HomeAssistant
